Fall 2022

Serving in
Honduras
on a road
to the future

In the remote mountains of Honduras, World Gospel Outreach operates a children's home, Rancho Ebenezer. *The mission of Rancho Ebenezer is to provide children with safe, affectionate and Christ-centered homes, nurture the character of each child individually, treat emotional and psychological distress, inspire to genuine relationships with Jesus Christ, and equip for lives of successful independence.* Tech Serve is privileged to provide skilled assistance for this incredible mission, and has sent teams for many years to help with this and other projects.

Ethan Tyler using his skills on the dozer

(cont) - This trip was about repairing the 3 mile long road to the Ranch. Because of Covid there hasn't been a team for 2 years so the road needed lots of work! Tim Tyler led a team that included Bill Hooten, Ethan Tyler, and Rodney Castleberry. The fellows spent a week working the road and repairing equipment. Thank you guys for your servants heart to help the children at Ebenezer Ranch!

Bill Hooten

Tim Tyler

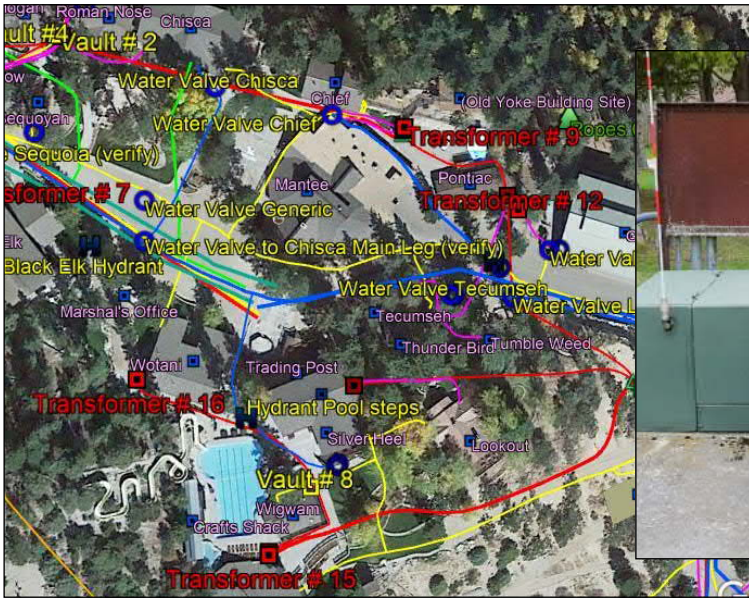

The dozer broke down over the weekend with a blown hydraulic hose, but on Monday the guys were able to get the replacement installed and get it back on the road to finish!

Bill Hooten repairing a muffler. There are plenty of opportunities to repair and service equipment! As a former missionary to Honduras Rodney was able to go up and down the road visiting people.

Pictured above, Dale Jones locating everything!

To the left, Tom Slatten providing some GIS training to Zack at Cedar Bay Campus.

Trade School for Haitians

In Carrefour Haiti, the Peace Project bought some property and has asked Tech Serve to build the building. Pictured below is the 2 story Trade School with downstairs shops for hands on instruction.

Recently Larry Zaugg traveled to the site and got the land prepared for a new slab. Working tirelessly Larry directed the operation and in a week the slab was poured and is ready for the building to arrive. Half of the building is in a container on its way to Haiti, the other half is here in Arkansas being loaded onto another container. When the container arrives on the jobsite the finished slab awaits Dale Jones and crew to stand the steel!

Hand mixed Cement!

Larry and many local Haitians did a great job pouring the slab!

The Container going to Karanda is set to arrive soon. When it is onsite we are planning a trip to install all of the Fiber, Network Gear, and VOIP telephone systems. This will most likely happen in March through May of 2023. If you have skills and are interesting in going to help install these systems, please give us a call!

Our trusty printer that handles our newsletters as well as other ministries is beginning to fail after about 10 years. Replacing this will cost about \$2000, so if you would like to help us purchase a new one, we will be grateful!

TSI is grateful for the many opportunities to serve people and ministries. If you need help with logistics, fiber networks, electrical engineering, telephone and VOIP Systems, GIS systems, etc, please call, we would love to help!

Tech Serve is indebted to so many of you who pray for us, support us, and go with us to be a help to so many. You make serving a Joy and we are privileged to work along side of you! Please feel free to call or visit our website for more information. 501-679-2120 www.techserve.org

Thank You for supporting Tech Serve!
